

**REMARKS**

The amendments to the Informal Sequence Listing correct errors of a typographical nature made without deceptive intent. The first corrects the serotype number of C. jejuni of SEQ ID NO:21 from O:1 to O:10 to conform to the nucleotide sequence immediately preceeding it, SEQ ID NO:20, and from which it is translated. The second amendment deletes "O:1" from the correct serotype, "O:36", for the nucleotide sequence for SEQ ID NO:22, whose translation product in SEQ ID NO:23 may be found immediately following, with the correct serotype.

Applicants also request entry of the amendments to the specification in adherence with 37 C.F.R. §§1.821 to 1.825. The information contained in the computer readable form of the Sequence Listing for Application No. 09/816,028, submitted September 10, 2001, was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy, a copy of which is enclosed for the convenience of the Examiner. This amendment contains no new matter.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-49, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

Appl. No. 10/735,419

PATENT

Amdt. dated April 8, 2004

Reply to Notice to Comply of March 26, 2004

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,
